### PERSONAL PROFILE

---

I am a frontend developer skilled in React.js, Next.js and TypeScript with a focus on building fast, accessible, and mobile-first interfaces. I am experienced in delivering production-ready applications through collaborative agile workflows. Known for writing clean, maintainable code and rapidly iterating on feedback. I have strong interest in UI performance and design-to-code fidelity.

### WORK EXPERIENCE

#### Freelance

##### Frontend Developer

Dec 2024 - Present

- Built and deployed mobile-first websites for small business clients using React and Tailwind CSS. Prioritized accessibility and responsive design.
- Collaborated with Figma designers and backend developers via GitHub and Slack, contributing UI components and consuming REST APIs to meet tight deadlines.
- Managed multiple projects simultaneously, meeting tight deadlines while maintaining high-quality standards.
- Communicated effectively with clients to gather requirements, provide project updates, and iterate on designs and functionality based on feedback.

#### Blockfuse Labs

##### Frontend Developer

Sep 2024 - April 2025

- Worked on analytics dashboard using Next.js. Contributed from feature planning to final deployment, implementing UI components and handling client-side logic.
- Converted complex Figma prototypes into scalable UI components with Tailwind CSS and TypeScript, following component-driven development best practices.

#### Stutern Internship

##### Frontend Developer

Jan 2024 - Jun 2024

- Contributed to team-based projects simulating real-world workflows using Git.
- Implemented pixel-perfect interfaces from Figma designs using React and Tailwind CSS. Focused on responsiveness and cross-browser compatibility.

### Technical Skills

**Languages/Frameworks:** JavaScript (ES6+), HTML, CSS, React.js, Next.js, TypeScript.

**Tools/Libraries:** Tailwind CSS, Git, Vite, NPM, Figma.

### EDUCATION

B.Eng, Chemical Engineering – University of Uyo, Nigeria (2023)

I transitioned to frontend development through self-taught projects, coding bootcamps, and practical internships and applied engineering problem-solving mindset to software development.
